## Company donates gel for pain-free pilgrimage

**KUALA LUMPUR** -- Pharma Field Synergy Sdn Bhd has donated 350 tubes of Flexiseq Gel to Lembaga Tabung Haji for pilgrims performing the haj this year.

The company is the official marketing and distributing partner of the product and it has made the annual contribution to Tabung Haji since 2012.

This initiative is part of the brand's mission to promote and ensure a pain-free pilgrimage. The gel was also donated to the haj pilgrims of Senegal.

Flexiseq is widely used not only to alleviate pain, but also to maintain mobility in the joints. It is derived from unique technology known as Sequessome™ vesicles that work as a biolubricant, penetrating

the skin and being absorbed into the joints to lubricate the damaged cartilage, thereby alleviating pain.

Flexiseq also does not contain any active pharmaceutical ingredients, making it extremely safe to be used in the long term, as well as in conjunction with other medication.

According to the Saudi Arabia government, osteoarthritis is officially recognised as a main obstacle to a comfortable and pain-free pilgrimage.

Tabung Haji also said osteoarthritis was the most widely reported ailment by pilgrims and therefore, it had included Flexiseq in its list of medical needs.

The annual donation of Flexiseq to Tabung Haji has yielded positive responses

from pilgrims who used the gel the last two years during their pilgrimage.

"According to the feedback from last year's pilgrims, applying the gel significantly eased the pain in their knees caused by excessive walking and that helped them tremendously with their journey. Many of them continued using Flexiseq to ease their knee pain on a daily basis," said Pharma Field Synergy managing director Ooi Eng Jin.

Flexiseq is also widely used by athletes and those with an active lifestyle.

Since its introduction in 2012, the product has received tremendous response.
